

The background of the slide is a stage set with a wall and floor made of vertical wood planks. There are seven spotlights mounted on the wall, each casting a warm, orange glow downwards. Along the base of the wall, there is a row of small, bright white lights. The floor is also made of wood planks, and the overall lighting is warm and dramatic.

Lighting Designer

By:Hailey Lisitza

Stage light

Stage light are a big wide light that covers almost the whole stage .They hang above the stage.

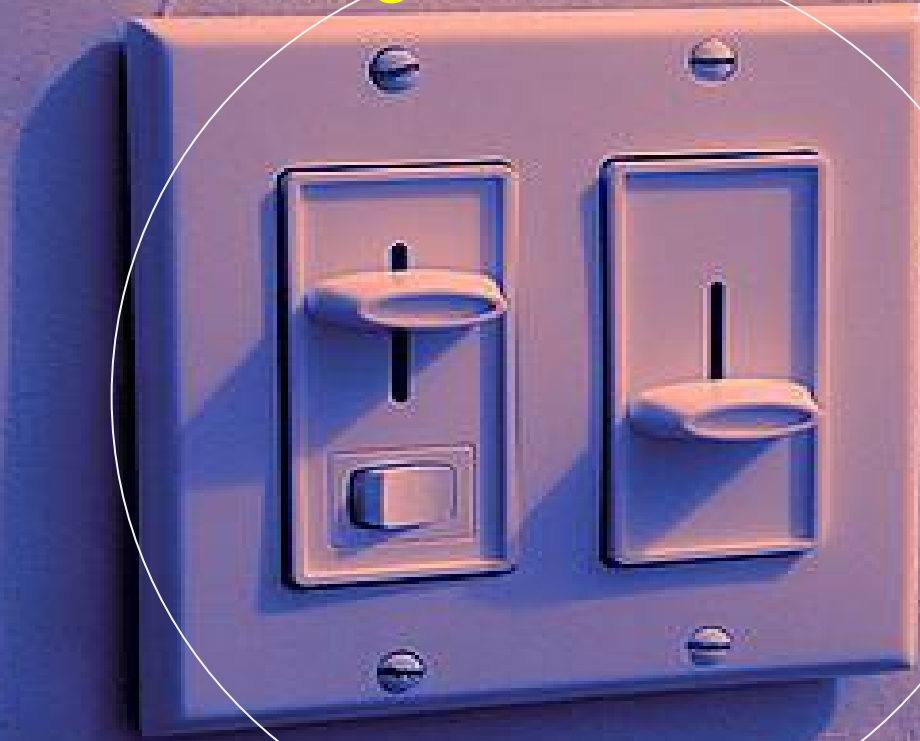

Light board

The light board is a board that has a control to put the light on and off

Home Dimmer switch

It controls how light it is and dark and in the middle.

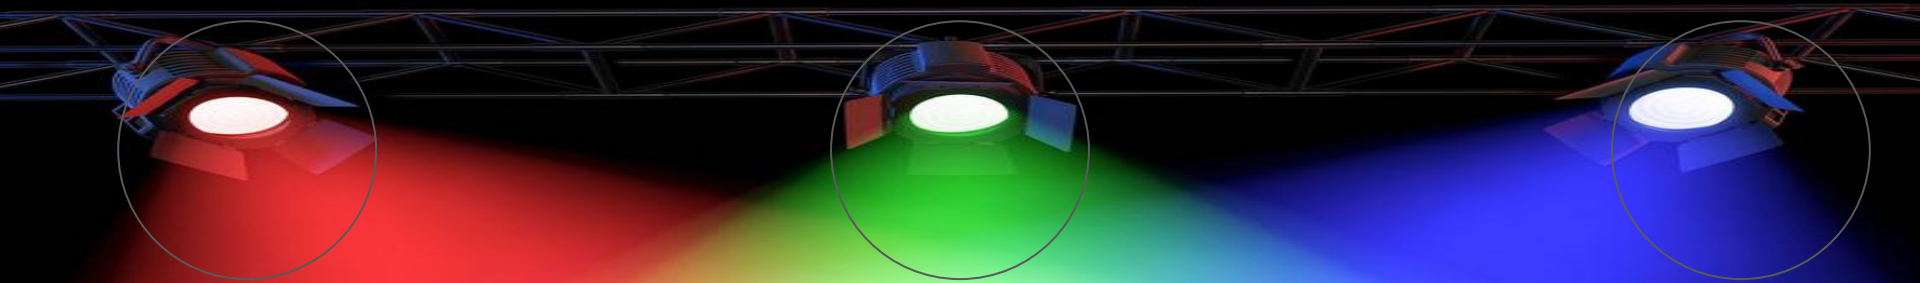

Dimmer Switch on the Light board

Spotlight

A spotlight is a light bright light that you shine just a few people.

Gel

It is a transparent material that is thin and in different colors that goes over the light

Gobo

It is a stencil that goes on the light and makes a cool design.

Some people who are lighting designers...
